The Public Health Nursing department attends to members of the Gila River and Ak-chin Indian communities and serves patients across the entire life span (newborn-elderly, pregnancy-post-partum). Each team member provides home visits related to wellness assessments, one-on-one health education with disease management, and select medication organization assistance. Our goal is to promote access to preventative services such as immunization administration and health screenings. Our family nurse practitioner (medical provider) enhances the department by providing primary, secondary, and tertiary medical management for Community members in their homes, at district service centers, PHN offices, and elder wellness centers. The practitioner also collaborates with Community events. PHN continues to strive and maintain Community trust by being the Community's first responders when it comes to their healthcare needs.
